REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Claims 1-16 are pending and allowed.
3. The sole base claim of the application, claim 1, can be summarized as follows:

Claim 1 covers a laminated hose having rubber and reinforcement layers, wherein the rubber layer is produced from:

- A) an ethylene/propylene/diene terpolymer or an ethylene/propylene copolymer,
 - B) a peroxide crosslinker,
 - C) a resorcinol compound,
 - D) a melamine resin, and
 - E) an epoxy resin.
4. None of the prior art of record, including the earlier-applied combination of Ikemoto (US 6,552,128) with Barnard (US 5,411,638) or JP 04352679A's abstract, can be fairly said to teach or suggest hoses having the features recited in claim 1.
 5. It is noted that the Ikemoto patent was overcome by applicant's translation of this application's priority document and the arguments in the 14 December 2004 response to the 14 September 2004 office action.
 6. No double patenting rejection is being made over the Ikemoto patent because it recites "consisting essentially of" in its claims. The use of reactive agents, such as epoxy resins, is not suggested by this language.
 7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
